Research outputs
Listing of Research outputs

Standard Plane Detection in 3D Fetal Ultrasound Using an Iterative Transformation Network
Research output: Contribution to journal › Article

Fast Multiple Landmark Localisation Using a Patch-based Iterative Network
Research output: Contribution to journal › Article

Human-level Performance On Automatic Head Biometrics In Fetal Ultrasound Using Fully Convolutional Neural Networks
Research output: Contribution to journal › Article

Attention-Gated Networks for Improving Ultrasound Scan Plane Detection
Research output: Contribution to journal › Article

A comparison of ultrasound with magnetic resonance imaging in the assessment of fetal biometry and weight in the second trimester of pregnancy: An observer agreement and variability study
Research output: Contribution to journal › Article

Fetal skull segmentation in 3D ultrasound via structured geodesic random forest
Research output: Chapter in Book/Report/Conference proceeding › Other chapter contribution

Management of systemic lupus erythematosus during pregnancy: Challenges and solutions
Research output: Contribution to journal › Review article

Research output: Contribution to journal › Article

Short term outcome of Perivable SGA: Is our counseling up to date?: Early SGA outcome
Research output: Contribution to journal › Article
An ergonomic handheld ultrasound probe providing contact forces and pose information

The above report is produced using the following setup
Ordered by: null
