Research outputs
Listing of Research outputs

**DKK3 overexpression attenuates cardiac hypertrophy and fibrosis in an angiotensin-perfused animal model by regulating the ADAM17/ACE2 and GSK-3β/β-catenin pathways**
Research output: Contribution to journal › Article

**Metabolism of 3-(13)C-malate in primary cultures of mouse astrocytes**
Research output: Contribution to journal › Article

The above report is produced using the following setup
Ordered by: null
