The Human Mucosal Mycobiome and Fungal Community Interactions
Research output: Contribution to journal › Review article

Using systems biology approaches to elucidate cause and effect in host-microbiome interactions
Research output: Contribution to journal › Review article

Mycobiome and Gut Inflammation: Implications in Gut Disease
Research output: Chapter in Book/Report/Conference proceeding › Chapter

Role of inter-species recombination of the ftsI gene in the dissemination of altered penicillin-binding-protein-3-mediated resistance in Haemophilus influenzae and Haemophilus haemolyticus.
Witherden, E. A. Jun 2014 In : Journal of Antimicrobial Chemotherapy. 69, 6, p. 1501-9
Research output: Contribution to journal › Article

PCR screening for the N526K substitution in isolates of Haemophilus influenzae and Haemophilus haemolyticus
Research output: Contribution to journal › Article

Prevalence and mechanisms of β-lactam resistance in Haemophilus haemolyticus.
Research output: Contribution to journal › Article

An evaluation of SNP-based PCR methods for the detection of β-lactamase-negative ampicillin-resistant Haemophilus influenzae.
Research output: Contribution to journal › Article

Prevalence and genotypic characteristics of beta-lactamase-negative ampicillin-resistant Haemophilus influenzae in Australia.
Research output: Contribution to journal › Article

The above report is produced using the following setup
Ordered by: null
