Research outputs
Listing of Research outputs

Development and internal validation of a predictive risk model for anxiety after completion of treatment for early stage breast cancer
Research output: Contribution to journal › Article

How to Develop Statistical Predictive Risk Models in Oncology Nursing to Enhance Psychosocial and Supportive Care
Research output: Contribution to journal › Review article

Adaptation and implementation of a mobile phone-based remote symptom monitoring system for people with cancer in Europe
Research output: Contribution to journal › Article

Walk this way: learning from a feasibility RCT of a walking intervention for people with recurrent and metastatic cancer
Research output: Contribution to journal › Meeting Abstract

The clinical effectiveness of decongestive treatments on excess arm volume and patient-centered outcomes when provided to women with early breast cancer-related arm lymphedema: systematic review
Research output: Contribution to journal › Article

Avoidant conversations about death by clinicians’ causes delays in reporting of neutropenic sepsis: grounded theory study
Research output: Contribution to journal › Article

Congruence Between Latent Class and K-modes Analyses in the Identification of Oncology Patients with Distinct Symptom Experiences
Research output: Contribution to journal › Article

Survivorship care and support following treatment for breast cancer: a multi-ethnic comparative qualitative study of women’s experiences
Research output: Contribution to journal › Article

Patients’ perceptions of end of treatment consultations for breast cancer: Jo Armes and colleagues assess the results of an evaluation of patients’ views of their quality of life, supportive care needs and the EoTC service
Research output: Contribution to journal › Article

The experience of chemotherapy-induced peripheral neuropathy in adult cancer patients: a qualitative thematic synthesis
Research output: Contribution to journal › Article
The symptom phenotype of oncology outpatients remains relatively stable from prior to through 1 week following chemotherapy.

Partnership between healthcare staff and carers on wards

Exploring patient perception of success and benefit in self-management of breast cancer-related arm lymphoedema

Barriers to early diagnosis of symptomatic breast cancer: a qualitative study of Black African, Black Caribbean and White British women living in the UK

Development and psychometric testing of inflammatory bowel disease fatigue (IBD-F) patient self-assessment scale

Identifying and meeting survivorship needs

A time to weep and a time to laugh: humour in the nurse-patient relationship in an adult cancer setting

A systematic review of barriers to early presentation and diagnosis with breast cancer among black women

Development of a Novel Remote Patient Monitoring System: The Advanced Symptom Management System for Radiotherapy to Improve the Symptom Experience of Patients With Lung Cancer Receiving Radiotherapy

Informal carers' experiences and needs when supporting patients through chemotherapy: a mixed method study

The experience of fatigue in people with inflammatory bowel disease: an exploratory study

Developing an intervention for cancer patients prescribed oral chemotherapy: a generic patient diary
Research output: Contribution to journal » Article

The experiences of older adults in the community dying from cancer and non-cancer causes: a national survey of bereaved relatives
Research output: Contribution to journal » Article

Patients' Supportive Care Needs Beyond the End of Cancer Treatment: A Prospective, Longitudinal Survey
Research output: Contribution to journal » Article

Working patterns and perceived contribution of prostate cancer clinical nurse specialists: A mixed method investigation
Research output: Contribution to journal » Article

An investigation of the quality of breast cancer information provided on the internet by voluntary organisations in Great Britain
Research output: Contribution to journal » Article

Telephone interventions for symptom management in adults with cancer
Research output: Contribution to journal » Article

Complex symptoms in advanced cancer: understanding multidisciplinary approaches
Research output: Contribution to journal » Meeting abstract

Information and support for Asian and African Caribbean women affected by breast cancer: role of voluntary organisations in meeting needs
Research output: Contribution to journal » Meeting abstract

Information and support needs of Asian and African Caribbean women with breast cancer: An exploratory study of the suitability and accessibility of services provided by cancer charities
Research output: Contribution to journal » Meeting abstract

Symptom clusters: a case study
Research output: Contribution to journal » Meeting abstract

Telephone delivered intervention for fatigue using motivational interviewing: an exploratory trial
Research output: Contribution to journal » Meeting abstract
Improving district nurses' confidence and knowledge in the principles and practice of palliative care
Research output: Contribution to journal › Article

Exploring the work of nurses who administer chemotherapy
Research output: Contribution to journal › Article

Supportive care needs of men living with prostate cancer in England: a survey
Research output: Contribution to journal › Article

Teamwork: a concept analysis
Research output: Contribution to journal › Article

Developing supportive care for family members of people with lung cancer: a feasibility study
Research output: Contribution to journal › Article

Meeting information needs on cancer-related fatigue: an exploration of views held by Italian patients and nurses
Research output: Contribution to journal › Article

Collaboration: Working together or cooperating with the enemy?
Research output: Contribution to journal › Editorial

Fatigue in patients receiving palliative care.
Research output: Contribution to journal › Article

Developing competence: an evaluation of a nurse rotation programme.
Research output: Contribution to journal › Article

Understanding the needs of men with prostate cancer: a multicentre UK survey
Research output: Contribution to journal › Meeting abstract

Caring for carers: A prospective audit of nurse specialist contact with families and carers of patients with lung cancer
Research output: Contribution to journal › Article
Experience of fatigue in adolescents living with cancer
Research output: Contribution to journal › Article

Supportive intervention for fatigue in patients undergoing chemotherapy: A randomized controlled trial
Research output: Contribution to journal › Article

A feasability study to evaluate group intervention for people with cancer experiencing fatigue following treatment.
Research output: Contribution to journal › Article

Palliative care services in England: a survey of district nurses' views
Research output: Contribution to journal › Article

Hair loss with chemotherapy: at a loss over its management?
Research output: Contribution to journal › Article

A multi-method evaluation of the Prostate Cancer Charity specialist nurse programme.
Research output: Contribution to journal › Meeting abstract

A multi-method evaluation of the prostate cancer charity specialist nurse programme
Research output: Contribution to journal › Meeting abstract

A phenomenologic study of fatigue in adolescents receiving treatment for cancer.
Research output: Contribution to journal › Article

Arm massage before chemotherapy: a randomised exploratory trial.
Research output: Contribution to journal › Meeting abstract

Exploring the work of nurses who administer chemotherapy: education, worries and attitudes questionnaire
Research output: Contribution to journal › Meeting abstract

Striving for normality: the experience of cancer related fatigue in young people
Research output: Contribution to journal › Article

Supporting the family: a feasibility study to develop and evaluate a nursing intervention
The work of chemotherapy nurses.

The work of chemotherapy nurses: an ethnography

24-hour district nursing services for palliative care patients: the challenge for cancer networks.

A cross-organisational clinical rotation programme for nurses in cancer and palliative care: a pilot project.

Fatigue examined in exhaustive survey

Is access to community nursing for palliative care patients equitable?

Out-of-hours care in the last months of life: the needs of cancer and noncancer patients

Striving for normality: the experiences of cancer-related fatigue in young people

When randomised controlled trials are not possible - design issues from national evaluation.

Fatigue in adolescents with and following a cancer diagnosis: developing an evidence base for practice

Quality and efficacy of educational materials on cancer-related fatigue: views of patients from two European countries
Cancer-related fatigue - a difference of opinion? Results of a multicentre survey of healthcare professionals, patients and caregivers
Research output: Contribution to journal › Article

The phenomenon of fatigue in young people.
Research output: Contribution to journal › Meeting abstract

Cancer-related fatigue in focus
Research output: Contribution to journal › Article

Facilitating patients' coping with fatigue during chemotherapy - Pilot outcomes
Research output: Contribution to journal › Article

Guest Editorial. Education and high quality community care
Research output: Contribution to journal › Article

in England 'What a pity I did not know before! How cancer patients feel about the information they receive about fatigue. Pflege. Schade, dass ich dies nicht vorher gewusst habe! Was krebskranke von den informationen uber fatigue halten: eine beurteilung durch patienten in der Schweiz
Research output: Contribution to journal › Article

Cancer-related fatigue: Inevitable, unimportant and untreatable? Results of a multi-centre patient survey
Research output: Contribution to journal › Article

The above report is produced using the following setup
