Research outputs
Listing of Research outputs

Structural and enzyme kinetic studies of retrograded starch: Inhibition of α-amylase and consequences for intestinal digestion of starch
Research output: Contribution to journal › Article

Role of polysaccharides in food, digestion, and health
Research output: Contribution to journal › Article

A mechanistic approach to studies of the possible digestion of retrograded starch by alpha-amylase revealed using a log of slope (LOS) plot
Research output: Contribution to journal › Article

The above report is produced using the following setup
Ordered by: null
