

## Research outputs

Listing of Research outputs

Patterson T, Rivolo S, Burkhoff D, Schreuder J, Briceno N, Williams R et al. **Impact of Coronary Artery Disease on Contractile Function and Ventricular-Arterial Coupling During Exercise: Simultaneous assessment of left-ventricular pressure volume and coronary pressure and flow during cardiac catheterisation.** Physiological Reports. 2021.

Patterson T, Rivolo S, Burkhoff D, Schreuder J, Briceno N, Allen C et al. **Physiological Impact of Afterload Reduction on Cardiac Mechanics and Coronary Hemodynamics Following Isosorbide Dinitrate Administration in Ischemic Heart Disease** . Journal of cardiovascular translational research. 2021.

Rahman H, Demir OM, Ryan M, McConkey H, Scannell C, Ellis H et al. **The optimal use of vasodilators for diagnosis of microvascular angina in the cardiac catheterization laboratory.** Circulation: Cardiovascular Interventions. 2020 May 5.
