Antimagicness of Generalized Corona and Snowflake Graphs
Research output: Contribution to journal › Article

Maximizing the size of planar graphs under girth constraints
Research output: Contribution to journal › Article

Degree/diameter problem for trees and pseudotrees
Research output: Contribution to journal › Article

PARALLEL ALGORITHMS FOR MAPPING SHORT DEGENERATE AND WEIGHTED DNA SEQUENCES TO A REFERENCE GENOME
Research output: Contribution to journal › Article

On graphs of defect at most 2
Research output: Contribution to journal › Article

Construction of Antimagic Labeling for the Cartesian Product of Regular Graphs
Research output: Contribution to journal › Article

Eph and NMDA receptors control Ca2+/calmodulin-dependent protein kinase II activation during C-elegans oocyte meiotic maturation
Research output: Contribution to journal › Article

Randoms variance reduction in 3D PET
Research output: Contribution to journal › Article

The above report is produced using the following setup
Ordered by: null
