Reinventing schizophrenia: The rules of the game
Research output: Contribution to journal › Article › peer-review

Variability of glucose, insulin, and lipid disturbances in first-episode psychosis: a meta-analysis
Research output: Contribution to journal › Article › peer-review

Dopamine and glutamate in individuals at high risk for psychosis: a meta-analysis of in vivo imaging findings and their variability compared to controls
Research output: Contribution to journal › Article › peer-review

N-methyl-D-aspartate receptor availability in first-episode psychosis: a PET-MR brain imaging study
Research output: Contribution to journal › Article › peer-review

Magnitude and variability of structural brain abnormalities in neuropsychiatric disease: Protocol for a network meta-analysis of MRI studies
Research output: Contribution to journal › Article › peer-review

Correction: Striatal dopaminergic alterations in individuals with copy number variants at the 22q11.2 genetic locus and their implications for psychosis risk: a [18F]-DOPA PET study (Molecular Psychiatry, (2021), 10.1038/s41380-021-01108-y)
Research output: Contribution to journal › Comment/debate › peer-review

Acute psychological impact of coronavirus disease 2019 outbreak among psychiatric professionals in China: A multicentre, cross-sectional, web-based study
Research output: Contribution to journal › Article › peer-review

Individual Differences in Response to Antidepressants: A Meta-analysis of Placebo-Controlled Randomized Clinical Trials
Research output: Contribution to journal › Article › peer-review

Dopaminergic organisation of striatum is linked to cortical activity and brain expression of genes associated with psychiatric illness
Research output: Contribution to journal › Article › peer-review
The magnitude and heterogeneity of antidepressant response in depression: A meta-analysis of over 45,000 patients
Research output: Contribution to journal › Article › peer-review

The Topography of Striatal Dopamine and Symptoms in Psychosis: An Integrative Positron Emission Tomography and Magnetic Resonance Imaging Study
Research output: Contribution to journal › Article › peer-review

Sleep and Circadian Rhythm Disturbance in Remitted Schizophrenia and Bipolar Disorder: A Systematic Review and Meta-Analysis
Research output: Contribution to journal › Article › peer-review

Disentangling relapse and adherence in psychosis
Research output: Contribution to journal › Comment/debate › peer-review

Magnitude and heterogeneity of brain structural abnormalities in 22q11.2 deletion syndrome: a meta-analysis
Research output: Contribution to journal › Review article › peer-review

Association of Ketamine With Psychiatric Symptoms and Implications for Its Therapeutic Use and for Understanding Schizophrenia: A Systematic Review and Meta-analysis
Research output: Contribution to journal › Article › peer-review

Glutamatergic and dopaminergic function and the relationship to outcome in people at clinical high risk of psychosis: a multi-modal PET-magnetic resonance brain imaging study
Research output: Contribution to journal › Article › peer-review

Dopamine and glutamate in schizophrenia: biology, symptoms and treatment
Research output: Contribution to journal › Article › peer-review
Glutamate levels in the anterior cingulate cortex in un-medicated first episode psychosis: a proton magnetic resonance spectroscopy study

Altered glutamatergic response and functional connectivity in treatment resistant schizophrenia: the effect of riluzole and therapeutic implications

Task-induced functional brain connectivity mediates the relationship between striatal D2/3 receptors and working memory

Correction to: Is psychosis a multisystem disorder? A meta-review of central nervous system, immune, cardiometabolic, and endocrine alterations in first-episode psychosis and perspective on potential models (Molecular Psychiatry, (2019), 24, 6, (776-794), 10.1038/s41380-018-0058-9)

Mesolimbic Dopamine Function Is Related to Salience Network Connectivity: An Integrative Positron Emission Tomography and Magnetic Resonance Study

Schizophrenia, Dopamine and the Striatum: From Biology to Symptoms
β-Adrenoceptor blockade modulates fusiform gyrus activity to black versus white faces
Research output: Contribution to journal › Article › peer-review

Glutamate and dopamine in schizophrenia: an update for the 21st century
Research output: Contribution to journal › Article › peer-review

The diagnosis debate
McCutcheon, R., Dec 2014
Research output: Other contribution

The practical management of refractory schizophrenia: the Maudsley Treatment REview and Assessment Team service approach
Research output: Contribution to journal › Article › peer-review

Opposing neural effects of naltrexone on food reward and aversion: implications for the treatment of obesity
Research output: Contribution to journal › Article › peer-review

Community treatment orders for patients with psychosis
McCutcheon, R., 10 Aug 2013, In: The Lancet. 382, 9891, p. 501
Research output: Contribution to journal › Article

Letter to the editor
Research output: Contribution to journal › Article

The Topography of Striatal Dopamine and Symptoms in Psychosis: An Integrative PET and MRI study
McCutcheon, R., 10 Apr 2010, (Accepted/in press) In: Biological Psychiatry: Cognitive Neuroscience and Neuroimaging.
Research output: Contribution to journal › Article › peer-review
