Correction to: Task sharing for the care of severe mental disorders in a low-income country (TaSCS): study protocol for a randomised, controlled, non-inferiority trial

Charlotte Hanlon1,2*, Atalay Alem1, Girmay Medhin3, Teshome Shibre4, Dawit A. Ejigu5, Hanna Negussie1, Michael Dewey2, Lawrence Wissow6, Martin Prince2, Ezra Susser7,8, Crick Lund2,9 and Abebaw Fekadu1,10

Following publication of the original article [1], the authors notified us that they mistakenly indicated they would report medication adherence as a trial outcome measured by the Morisky Medication Adherence Scale. However, the authors will no longer use this measure of adherence in the TaSCS trial analysis.
